Dear Dr. Marinov,

As project coordinator of two big international baggage handling and logistic projects funded by the Austrian Ministry of Transportation (BaggageLess and smartBOX) I would like to express my appreciation and support for the research project regarding baggage handling in metro or urban freight by rail that has recently been undertaken by Daniel Brice at Newcastle University .

I am currently promoting the outcome of this project within our consortium composed of several big railway and logistic operators such as Austrian, German, Swiss Railways, the Austrian post and many more. The outcome of the project is a very useful case study that has already been submitted to and discussed in the whole project consortium.

Best regards,

Dr. Bernhard Rueger
